**LOYOLA SCHOOL, BHUBANESWAR**

**Second Class Evaluation – November 2025**

**Class: IX** **Subject: Geography** **F.M.= 20** **Time: 40min**

**Q1. CHOOSE THE CORRECT ANSWER :-** **[5]**

1. The ending point of a river is called .
   a. source
   b. glacier
   c. mouth
   d. focus
2. most of the river originate from the
   a. mountains
   b. lakes
   c. glaciers
   d. All of the above
3. Plant prevents the rocks from being;
   a. fertile
   b. weathered
   c. eroed
   d. non of these
4. the polar regions are subjected to
   a. mechanical weathering
   b. Chemical weathering
   c. Biological weathering
   d. None of these
5. The longitudinal valleys are also called
   a. Barchans
   b. seifs
   c. sand dunes
   d. all of the above

Q**2. Answer the following:** **[2 x 5 = 10]**

a) What is mechanical weathering? Name the two types of mechanical weathering
b) What is the main function of a river at upper course and why?
c) Differentiate between hydration and solution.
d) State any four characteristics of sand dunes.
e) Explain oxidation.

Q**3. Give reason for the following:**

a) Physical weathering is known as mechanical weathering.
b) Erosion is the more dominant activity in the upper course of a river.
c) All the rivers do not form delta.
d) Physical weathering is more rapid in deserts.
e) Migratory sand dunes are uncertain and dangerious

**********ALL THE BEST**********

e. most of the river originate from the

f. ;

a.
b.

a. Barchans
b. seifs
c. sand dunes
d. all of the above

. Q**2. Answer the following:** **[2 x 5 = 10]**

f) What is mechanical weathering? Name the two types of mechanical weathering
g) What is the main function of a river at upper course and why?
h) Differentiate between hydration and solution .
i) State any four characteristics of sand dunes.
j) Explain oxidation.

Q**3. Give reason for the following:**

a) Physical weathering is known as mechanical weathering.
b) Erosion is the more dominant activity in the upper course of a river.
c) All the rivers do not form delta.
d) Physical weathering is more rapid in deserts.
e) Migratory sand dunes are uncertain and dangerious.
